

# Call For Papers

## Call for Papers

for the 2.

## PERMAS Web-Users' Conference

between

**June 29 and July 14 2022**

The next PERMAS Users' Conference will also take place as a virtual meeting. We are planning a series of half-day events to achieve the best possible ratio between effort and attention. By this, we expect best attention for your presentations with little effort and easy integration into everyday work.

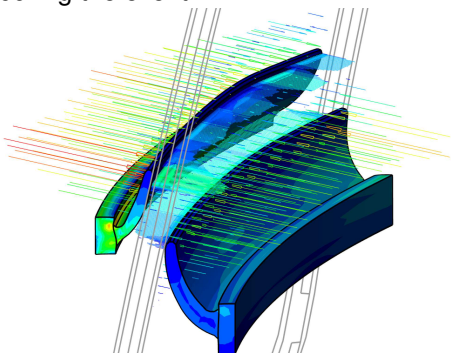

We cordially invite you to talk about your applications and experiences with PERMAS/VisPER. Whether new or proven simulation topics, every area of application offers interesting aspects that deserve it to be exposed. We look forward to each of your suggestions.

We ourselves would also be curious to learn more about your experiences with e.g.:

- Contact (multigrid)
- Optimization
- Dynamics and fluid-structure acoustics
- Design of electric vehicles
- Nonlinear material

A lively exchange of experiences is driven from your contributions.

INTES will do its best to create a pleasant atmosphere during the event.

Window Seal  
(Tmeet2021)

### Dates (preliminary)

29+30.6; 5+6.7, (13+14.7)  
resp. 9-11:30 (UTC+2)
