

Call for Papers

Call for Papers for the 18th PERMAS Users' Conference on April 23 and 24, 2026 in Tübingen

INTES cordially invites you to the PERMAS Users' Conference in the historic building of the museum society. The university town of Tübingen, with its medieval city center and its academic tradition dating back to 1477, offers the perfect setting for an inspiring professional exchange.

Your contribution to the conference

The focus of the conference is on you, the users. We cordially invite you to give a presentation on your work with PERMAS and VisPER. Share your experiences and simulation workflows with the community! Both innovative new applications and proven methods are valuable topics that we would like to present to a broad audience.

Take advantage of the opportunity

The conference is an ideal platform:

- For intensive exchange of experiences with colleagues.
- To get new ideas for your daily work with PERMAS.
- For direct discussions with INTES experts and developers as well as with partners.

Our goal is to create a productive and stimulating conference atmosphere that benefits all participants. We will design the program with you and for you – your contribution is important to us!

We hope for an interesting event with lively discussions and look forward to welcoming you to Tübingen.

Conference Date

Thu., April 23 and
Fri., April 24, 2026

Venue

Museum, Beletage, 1. OG
Wilhelmstr. 3
D-72074 Tübingen

Language

All lecturers are kindly asked to give their presentation in English.

Topics

All applications with PERMAS/VisPER are welcome, like in statics, dynamics, acoustics, heat transfer or optimization. INTES will contribute with recent developments of the coming PERMAS Version 21.

Presentation

Duration 20 to 25 minutes with subsequent short discussion.
