

PERMAS *for Education*

PERMAS is one of the worldwide leading Finite Element software systems for the solution of complex analysis tasks in research and industry.

PERMAS covers a wide spectrum of application areas like static analysis, dynamics, temperature fields and fluid-structure acoustics.

Many outstanding properties like

- fast solvers,
- exact and fast contact analysis,
- many nonlinearities,
- harmonic balance method,
- integrated optimization for topology, shape, sizing, sampling (DOE), and reliability analysis,
- Interfaces: VisPER, ANSA, ABAQUS, NASTRAN, MEDINA, HyperWorks, NX.

FE process chain
from mesh to evaluation,
on Windows and Linux.

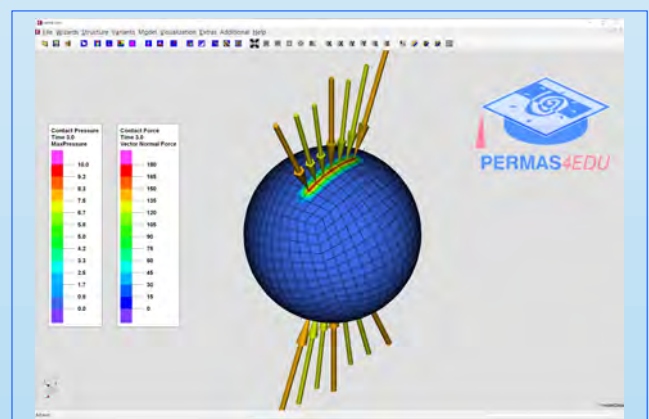

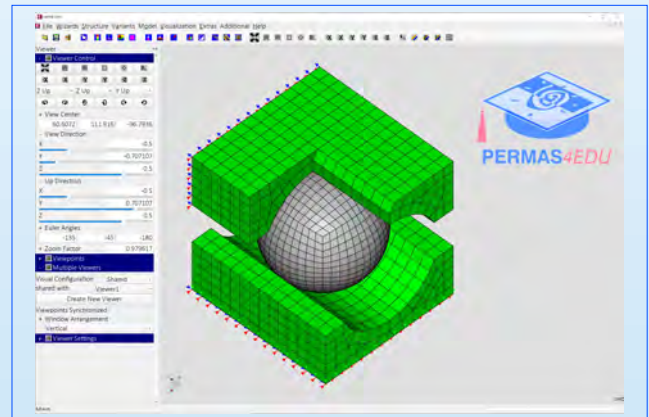

Free-of-charge for
education and further training,
no commercial use permitted.

Limited model sizes, e.g.
16,000 nodes, 32,000 elements,
65,000 degrees of freedom.
